TECHNICAL SKILLS
JavaScript, HTML, CSS, React.js, Flux
Node.js, SQLite, RESTful APIs

WEB DEVELOPMENT PROJECTS
instaOZsome(https://github.com/Ahhhz/NYCDA_InstagramClone)
An Instagram clone using Node.js
- Node module express/ Used to set up server that runs the app on port 1133
- Node module passport/ Used to set up authentication for users that sign up then login using their credentials…local strategy used for auth.
- Node module sqlite/ Used for database…this is where tables for our db were created and how followers, new users, and existing users are managed.

CNTRL-ForLife(https://github.com/Ahhhz/CNTRL-Forlife)
A frontend OCR used to read text from images
- Google Cloud Vision API/ Used to read the text within the image file.
- Webpack & Babel/ Webpack used to bundle JS files/ Babel used to compile JS from ES6 to ES5
- Node module Fuse.js/ Used as a means to search keywords within image text
